## Bet the Farm on Carlisle's GeoMembranes

As government continues to enforce more stringent environmental regulations on animal farms, the need for an efficient, cost-effective animal wastewater containment system becomes increasingly important. GeoEPDM membrane systems from Carlisle SynTec provide the most cost-effective, long-term solution for virtually any exposed animal wastewater containment application.

Significantly cheaper to install than concrete or HDPE, Carlisle's GeoEPDM systems feature durable, highly puncture-resistant membranes that have proven themselves in exposed applications for more than 40 years. GeoEPDM membranes are backed by a 20-year material warranty and are specially designed to handle animal wastewater without reducing the integrity of the system. Carlisle manufactures GeoEPDM membranes in sizes up to 50-feet wide by 200-feet long, reducing your labor costs and increasing the speed of installation.

So, whether you plan to install the system yourself or hire a professional, Carlisle's GeoEPDM system is guaranteed to save you money. Their experienced and knowledgeable field service representatives will also be there to answer all of your questions along the way. So don't hesitate, let Carlisle's rich history and expertise guide you through your next animal waste water containment installation.

## Features and Benefits:

- The only Potable Grade ANSI/NSF 61 EPDM membrane available
- Non-toxic to most fish and plant life
- Superior elongation and lay-flat characteristics
- Exceptional resistance to solar UV, ozone and oxidation.
- Flexible, conforming to the most demanding sub-grades
- Manufacturing in two state of the art plants
- Ease of installation with no special tools required
- Tough and durable with 40 years of proven history and performance
- 20-year material warranty
- Low maintenance
- Large prefabricated custom panels up to 50' X 205'
- Eliminates most water loss to ground water seepage
- Easily repaired with no special tools
